## Jamestown Welcomes Historical Marker

**I**n collaboration with the Indiana Historical Bureau (IHB), the Jamestown Park Board established Boone County's ninth official historical marker in downtown Jamestown this August. Located next to the Tri-Area Library on Main Street, the marker recognizes Herman B. Wells, the first university chancellor of Indiana

# History in the Making

## A Message from IMPA

**T**hough the COVID-19 pandemic has shaken our sense of normalcy, the course of history shows us that the emergence and rapid spread of a deadly illness is anything but abnormal. Humanity has been confronted by detrimental outbreaks of contagious diseases before, such as the Bubonic Plague in Europe, the Smallpox outbreaks in the Americas, and the Spanish Flu during World War I. Each of these difficult moments in humanity's past has been paired with significant cultural and social changes, and the COVID-19 pandemic is certainly following suit.

Many of the same practices that are complicating our life today were frequently implemented to mitigate the spread of infectious diseases in years past, including self-isolation and the limiting of public gatherings. The word "quarantine" itself became popularized in 17th century Italy to describe a mandated isolation (frequently lasting 40 days) that was required of newly arrived travelers to prevent the development of foreign diseases in Italy. Since we still have no reliable treatments or vaccinations to address COVID-19, revisiting the strategies of time gone by is currently our best approach to battling the ongoing public health emergency. Regular social distancing and self-quarantine for those who show symptoms, accompanied by wearing masks, have shown to be the most effective ways to reduce the risk of the transmission of COVID-19 at the present time.

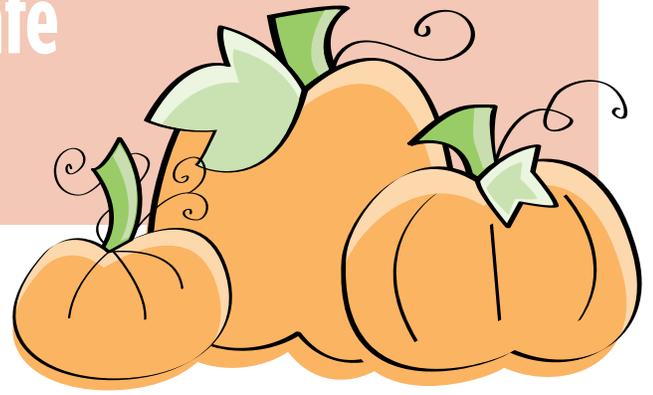

As your community's wholesale power provider, the Indiana Municipal Power Agency (IMPA) embraces its role as an essential service provider through the developing pandemic. COVID-19 is unique from past plagues and outbreaks in that our world is

now connected virtually. Through isolation and social distancing, we can still call family and friends, stream entertaining content, and attend virtual doctors' appointments, business meetings, and religious services. All these things are possible through the power of modern electricity and the country's electric distribution infrastructure. Without the hard work of utility employees on the front lines through COVID-19 to continue supplying a bit of normalcy to the world, we would truly be back in the "dark ages."

Though it was all the way back in March when the first confirmed case of COVID-19 came to Indiana, Hoosier communities are still adapting to the ever-evolving global situation. IMPA and utility personnel in all of the Agency's member communities continue to remain diligent at work and in public spaces. Maintaining the health and well-being of the community, along with a reliable electric service, is at the core of everything the Agency and your local utility are doing.

As history shows, our world has healed from disease outbreaks before, and it will certainly heal from COVID-19. As troubling as the current pandemic is to all of us, societies of the past have confronted similar obstacles and triumphed. We will surely follow in the footsteps of our predecessors, and we can learn a great deal from their actions and innovations. As we look forward in the fight against COVID-19, IMPA encourages everyone to be safe and know that we are all in this together. •

# Keep Your Information Safe This Holiday Season!

**H**ackers know that during this time of year, we are all more likely to pull out our credit cards and do some online shopping in preparation for the holidays. As a result, cybercriminals have come up with some crafty ways to ruin all your holiday fun. Whether you're buying decorations, party favors, or gifts, be sure to keep these tips in mind to make sure you can keep that carefree, festive spirit alive!

- **Only shop on reliable websites.** Use the websites of retailers you know and trust and be sure to access their webpages through a reliable search engine or by directly typing their URL into an address bar.
- **Be wary of online discounts.** If an offer is too good to be true, it probably is! Unreliable websites and fake companies attempt to bait victims by offering fake discounts that lead to fraudulent links. Only use coupon codes or discounts provided by trusted retailers.
- **Beware of seasonal frauds.** Phishing is a form of cyberattack where hackers use emails to impersonate a trustworthy source and lure victims into clicking malicious links. Around the holidays, hackers send out fake package tracking emails, e-cards, charity donation scams, and purchase confirmations. Before clicking on links in an email, always be sure that it comes from a trusted source.

The **Indiana Municipal Power Agency**, your community's wholesale power provider, wants you and your family to have a wonderful, safe holiday season. Follow us on our social media accounts for plenty of holiday fun and safety tips!

University, who was also born and raised in Jamestown. Town officials were excited to celebrate the installation of the marker to encourage learning opportunities in the community.

Born in Jamestown in 1902, Wells spent his entire childhood in the community before moving to Lebanon with his family in 1917. By 1937, Wells accepted the position of President of Indiana University after spending the last two decades making strides in both academia and the banking industry, making him the youngest university president in the nation. During his 25-year tenure as president, Wells became known for his fervent support of IU students and faculty. Under his direction, IU expanded its student body and international reputation, transforming into the institution that it is today. Wells always dedicated his time to IU students, as indicated by his commitment to signing every diploma by hand during his presidency—amounting to over 60,000 signed diplomas. After retiring from the role of President, Wells continued to contribute to IU's success as the university's first chancellor. After his death in 2000, Wells was brought back to his birthplace of Jamestown and buried in the community's Independent Order of Odd Fellows Cemetery.

As a notable Hoosier historical figure, community members are proud to commemorate Wells' memory in his hometown of Jamestown. Town officials joined with the public on the afternoon of August 1st to hold a dedication ceremony for the milestone in the community.

The marker itself memorializes Wells' achievements in social equality, academic freedom, economics, education, and banking reforms. This state historical

marker is one of many across Indiana that serve to preserve Hoosier history and educate passersby. The Indiana Historical Marker Program has erected hundreds of markers throughout the state, all recognizing historically significant individuals, organizations, events, and locations.

Boone County historian Eric Spall, whose suggestions and support did much of the work to bring the Wells marker to Jamestown, continues to work with the Historical Marker Program to bring more markers into the county. For more information on the IHB marker program, visit [www.in.gov/history/](http://www.in.gov/history/)!

# Online Utility Bill Pay

If you would like to pay your utility bills online, visit the Jamestown website at [jamestownin.com](http://jamestownin.com) and follow the “Utility Bill Pay” link on the home page. This link will take you to a safe and secure login portal for you to pay for your monthly usage.

As a reminder—NEVER pay utility bills on unauthorized websites, or sites that are not associated with Jamestown. If you are unsure whether you are on an authorized site, give the town a call at (765) 676-6331. •

## Tidbits & Trivia

The **Indiana Municipal Power Agency (IMPA)** is a not-for-profit organization that provides an economic, reliable, and environmentally responsible power supply to its members. IMPA provides this wholesale power to 61 communities in Indiana and Ohio. IMPA member utilities purchase their power through IMPA and deliver that power to the residents and companies within your community.

**Question:** In what year was the Indiana Municipal Power Agency founded?

Send your answer to [newsletter@impa.com](mailto:newsletter@impa.com), along with your name, e-mail address, and address for a chance to win an energy efficiency prize pack! We will randomly select the winner from a pool of correct entries.

If you would like assistance with your answer, visit our website at [impa.com](http://impa.com) and explore our pages for information that could help you formulate a good guess!

## Watt's the Word?

*Investigating power terminology*

### Energy

*noun*

The capacity to do work. In physics, it exists in potential, kinetic, thermal, **electrical**, and various other forms.

The origins of the English word “energy” come from the Ancient Greek term *energeia*, meaning “activity/operation.” The term was used by Aristotle in 4th century BCE to convey a force of expression in rhetoric. It wasn't until the 1800s that the word became associated with electricity, with engineer William Thomson claiming in 1867, “Electricity is a form of energy.” In physics, energy is measured in various units, such as joules, watts, calories, and more!

“energy, n.” OED Online, Oxford University Press, September 2020, [www.oed.com/view/Entry/62088](http://www.oed.com/view/Entry/62088).

### Cranberry Cheesecake

Recipe submitted by Betty Bird of Paoli, Indiana

- 16 oz Philadelphia cream cheese
- 16 oz finely shredded sharp cheddar cheese
- 2 tbsp honey
- 1 small bag of chopped raisins
- finely chopped pecans

Beat cream cheese until smooth, then mix in all other ingredients except for the pecans. Use a spatula and your hands to form the mixture into a ball. Coat the ball with the finely chopped pecans to create an outer crust. Serve with crackers, vegetables, pretzels, or whatever you like!

### Salted Peanut Chews

Recipe submitted by Roleen Pickard of Rockville, Indiana

- 3 cups mini marshmallows
- 2 cups Rice Krispies
- 2 cups salted peanuts
- 12 oz peanut butter chips
- 1 1/2 cups flour
- 2/3 cup brown sugar
- 3/4 cup margarine
- 2/3 cup corn syrup
- 2 egg yolks
- 1/2 tsp baking powder
- 1/4 tsp baking soda
- 3 tsp vanilla

Mix flour, brown sugar, baking powder, baking soda, egg yolks, 1/2 cup margarine, and 1 tsp vanilla, and press mixture into a greased 9"x13" pan. Bake for 10-15 minutes at 350° until golden brown. Sprinkle 3 cups mini marshmallows on top and return to oven for 2 minutes, or until marshmallows look puffy. Let cool.

In a sauce pan, heat corn syrup, remaining margarine, remaining vanilla, and peanut butter chips just until melted. Remove the sauce pan from heat, and add Rice Krispies and salted peanuts.

Spoon mixture from sauce pan over marshmallow crust. Chill, cut into bars, and serve!

**PRACTICE  
ELECTRICAL  
SAFETY:**

**DON'T**

**OVERLOAD**

**YOUR HOME**

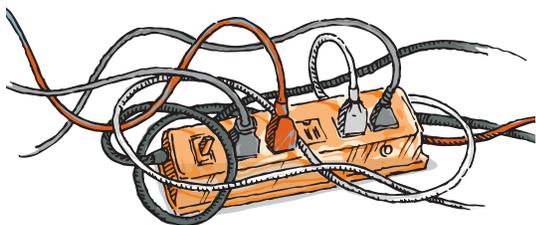

Annually, nearly 50,000 fires in the United States are caused by electrical failures or malfunctions. This results in more than 400 deaths, 1,500 injuries, and \$1.4 billion in property damage each year. Help lower your risk of electrical fires.

Here's how:

## Space Heater Safety

- Never leave a space heater unattended
- Locate space heaters out of high traffic areas and doorways where they may pose a tripping hazard
- Always unplug and safely store the heater when it is not in use
- Never use an extension cord with your space heater.
- Make sure your space heater is listed by a recognized testing laboratory
- Read the manufacturer's instructions and warning labels before using a space heater
- Space heaters are only meant to provide supplemental heat and should never be used to warm bedding, cook food, dry clothes, or thaw pipes

## Overload Warning Signs

Flickering, blinking, or dimming lights

Cracking, sizzling, or buzzing from receptacles

Mild shock or tingle from appliances or switches

Frequently tripped circuit breakers or blown fuses

Burning odor coming from receptacles or switches

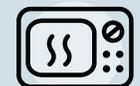

Warm or discolored wall plates

## Prevent Overloads

Never use extension cords or multi-outlet converters for appliances

Only plug one heat producing appliance into a receptacle outlet at a time

If you have too few outlets in your home, have a qualified electrician inspect your home and add new outlets

Power strips only add additional outlets; they do not change the amount of power being received from the outlet

Use appropriate watt bulbs for lighting fixtures

\*information from the American Public Power Association

The Municipal Power News is published by the Indiana Municipal Power Agency and the Town of Jamestown.

IMPA Commissioner: Bobby Taylor, Jr.

## Save on Energy Through the Holidays

The holidays are fast approaching, and so is the cold weather that accompanies them. While the temperatures trend downward, some residents and businesses may see their electric use go up. Luckily, since Jamestown's electric utility is a public power utility and a member of the Indiana Municipal Power Agency, your community already provides you with some of the best electric rates in Indiana. As outside temperatures cool down, you can take the following energy-saving measures to save even more on your utility rates.

- Find and seal any air leaks you feel coming from cracks or gaps in windows and doorways.
- Use energy-efficient holiday lighting. Verify that your decorations are Energy Star® certified.
- Take advantage of sunlight and open curtains on south-facing windows during the day to help warm your home.
- Set your thermostat as low as is comfortable during the day and reduce a few degrees when you are sleeping or away from home.
- Replace furnace and heat pump filters at least once a month for the best efficiency.
- Set your water heater to the warm setting at approximately 120°F.
