Meet South Whitley's New IMPA Commissioner

The Town of South Whitley recently appointed Town Council Member Randall Cokl to serve on the Indiana Municipal Power Agency's (IMPA) Board of Commissioners. Prior to Cokl, former Town Manager David Wilkinson served as IMPA's Commissioner for the last several years. IMPA greatly appreciates Wilkinson's years of service as the IMPA Commissioner, and also happily welcomes Cokl.

As an IMPA commissioner, Cokl will represent South Whitley's public power interests and provide essential input in directing IMPA's future. Cokl will be a vital addition to the Board as he has a working knowledge of the Town of South Whitley.

-continued on page 5

The Value of Electricity

If a group of people were asked to think of a few items that they cannot live without, a variety of answers may come up: food, water and basic shelter are usually some of the first objects that people may think of. Others may say their smart phones or their tablets. Still others might say their microwaves, televisions or vehicles. While these items run the gamut in terms of necessities and luxuries, they all have one component in common: the utilization of electricity. Without electricity, there would be no refrigerators to store food, or heaters and air conditioners to regulate the temperatures inside homes. Without electricity, there would be no way to power or charge electronics and other appliances. An extended power outage would also make it difficult to fill a car with gasoline and provide clean, filtered water. Virtually all of the necessities and luxuries in life are powered by electricity.

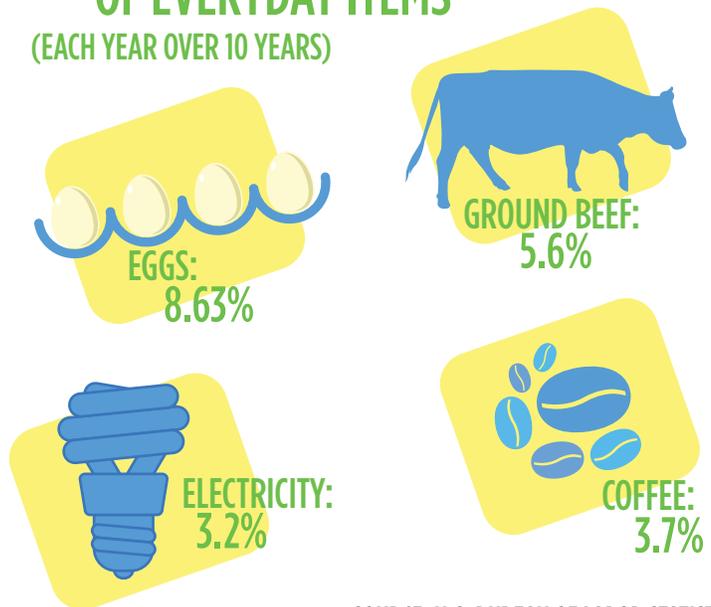

Cost Calculation of Electricity

So, since electricity plays such a vital role in nearly all aspects of life, the cost of electricity must be high to keep up with its demand, right? Actually, no. The cost of electricity is one of the greatest values in today's world. According to the U.S. Energy Information Administration, a government agency that collects, analyzes, and disseminates information pertaining to energy, the average monthly residential electric bill in Indiana is \$115.56. When that total is divided by the 31 days that make up an

average month, the average cost of electricity per day in Indiana is only \$3.73. That means that you are able to do laundry, prepare meals, watch television, charge smart phones, tablets and laptops, and complete a variety of other tasks at any time of the day or night, all for less than \$5 a day. In today's world, it's difficult to find anything of worth for under \$5, making the value of electricity even more surprising.

Not only is electricity a great value, but its average annual price increase is also low when compared to other daily staples. According to data from the U.S. Bureau of Labor Statistics, the cost of electricity has increased an average of 3.2% each year, over the last ten years. In comparison, the cost of coffee has increased 3.7%, ground beef has increased 5.6% and eggs have increased by 8.63%.

AVERAGE PERCENT PRICE INCREASE OF EVERYDAY ITEMS (EACH YEAR OVER 10 YEARS)

Average
Daily Cost of
Electricity in
Indiana

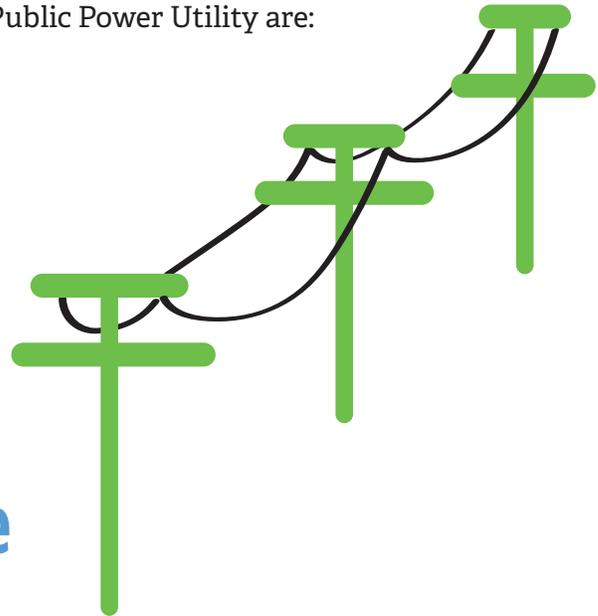

Electricity's average annual price increase is even more impressive when the amount of new technology and the energy it takes to power those devices is taken into consideration. While the advent and invention of new technology has been rapid over the past decade, the cost of electricity has not jumped significantly. Additionally, electricity is available 24 hours a day, 7 days a week, allowing light switches to be turned on at any hour, and heaters and air conditioners to run through the night. The value of having access to electricity at any time of the day or night for only a few dollars a day makes it one of the most economically advantageous products available.

The Value of an IMPA Community

Electricity is an excellent value all around, but because your community owns its own Municipal Electric Utility, electric rates in your community are even lower than in other towns and cities in Indiana. A Municipal Electric Utility, also sometimes called a Public Power Utility, means that a utility is owned and operated by the town or city in which it is located. Your hometown electric utility purchases low-cost and reliable electricity from the Indiana Municipal Power Agency (IMPA), and then uses its own equipment and infrastructure to deliver power to residents and businesses in the community. Some of the greatest benefits of a Public Power Utility are:

1. Low-cost power
2. Reliability
3. Local, hometown service

South Whitley Welcomes New Town Council Member

In January, the Town of South Whitley elected two new Council Members, Randall Cokl and Leslie Hoffman, as well as a new Clerk-Treasurer, Janet Howard. The *Municipal Power News* sat down with Leslie Hoffman to find out more about him and what made him excited to join the South Whitley Town Council.

Municipal Power News: What made you decide to run for the Town Council?

Leslie Hoffman: South Whitley is a great historic town with many interesting people and diverse businesses. With help from the Town Council and employees, South Whitley can build on these assets to provide a clean, comfortable, and safe place to live.

MPN: How long have you lived in South Whitley, and what are some of your favorite parts about living there?

LH: My wife and I have lived in South Whitley for 18 years. As we walk our dog Tucker or ride our bikes, we enjoy seeing the many friendly people and feeling the warm atmosphere of a small town.

MPN: What is your educational and career background?

LH: Upon graduating from Heritage High School in Allen County, I attended and received a BS in Agricultural Economics from Purdue University. After 17 years of business experience, I attended and received a BS and MS in Elementary Education with Middle School Endorsements from Indiana University – Purdue University Fort Wayne. This is my 20th year of teaching for Huntington County School Corporation where I currently teach 7th grade Social Studies.

MPN: Tell us a little more about your family.

LH: I have been married to my wife, Pam, for 36 years. We have two married children, Holly and Josh, and we have four grandchildren, Madisyn, Landon, Lydia, and Monty.

MPN: Finally, what are you most excited for when serving as a Town Council member?

LH: There are a number of opportunities available to help South Whitley grow in areas for the people. Many persons have ideas and stories to share, so I plan to be their voice in making South Whitley a better place for everyone.●

Commissioner

-continued from page 1

IMPA provides wholesale electric power to 60 communities, and each community has a representative on the Board. The Board is comprised of a diverse group of individuals with backgrounds ranging from utility superintendents and lineworkers to town council members and clerk-treasurers. Although their daily jobs may be different, these individuals do have one thing in common when they arrive at an IMPA Board meeting – their commitment to their community. Cokl is no different.

IMPA commissioners dedicate their time and energy to the Board, a commitment outside the realm of their daily life. Cokl will give his time to attend meetings and workshops so that he may bring information back and use it in South Whitley. Cokl and IMPA's other commissioners evaluate proposals, plan for the future and make decisions that are in the best interest of their community's municipal electric utility customers.

IMPA's commissioners serve another role as well – that of communicators. Cokl will serve as a channel of communication between IMPA and South Whitley. He is responsible for bringing information about the community and its needs to IMPA, as well as taking information learned from IMPA back to share with those in South Whitley. Amongst all the obligations of a commissioner, this is perhaps one of the most important duties. IMPA is a member-driven organization. It exists because of its member communities, and to serve its member communities. As South Whitley's representative to the Board, Cokl will be an advocate for public power to ensure that South Whitley's customers continuously receive low-cost, reliable and environmentally responsible electric power from IMPA. ●

Tidbits & Trivia

Question: Which of the following is a benefit of being an IMPA community?

- a) Local, hometown service
- b) Low-cost service
- c) Reliability
- d) All of the above

Send your answer to the question to IMPA, and we will randomly select winners from all of the correct entries to receive an energy efficiency prize pack. Please send your name, e-mail address and address with your answer to:

The **Indiana Municipal Power Agency (IMPA)** is a not-for-profit organization that provides a low cost, reliable and environmentally-responsible power supply to its members.

IMPA member utilities purchase their power from IMPA and deliver that power to the residents and companies within the community.

Joint Action Agency

noun.

A not-for-profit organization of municipal utilities that band together to jointly own and operate generation and transmission facilities to gain economies of scale.

Example: *IMPA is a Joint Action Agency.*

The Value of Electricity

-continued from pages 2-3

Municipally owned utilities are often able to provide lower-cost power to their customers than investor-owned utilities because they do not exist to make a profit for shareholders. All money earned by a municipally owned utility is used to cover costs and is invested to improve the electric system for everyone. For example, the average monthly bill for a community that is a Member of IMPA is \$111.62, while the monthly bill for a customer from an investor-owned utility is \$119.42, showing that those who live and work in an IMPA community receive an even greater value in terms of electricity.

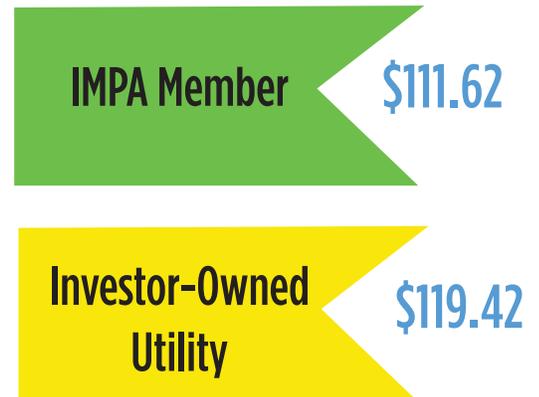

Additionally, a municipally owned utility often provides more reliable power because it is owned by the community that it serves. Whenever there is a problem or a power outage, it is addressed immediately by the employees at the utility. Those employees have a sense of pride and a sense of ownership in the utility because they, too, live in the community that they serve.

Finally, a municipally owned utility prides itself on local, hometown service. Public power employees are your friends and neighbors, and they have the same pride in your community that you do. That pride shows in their work on the utility distribution system – every pole, meter and wire is maintained to the highest standards by someone in the community. If there is a problem with your service and you contact the utility office, you talk with an actual person that works in a local office just a few miles down the road.

The Great Value of Electricity

Electricity is a necessity that is available and ready to be used at any time. For under \$5 a day (and even less if living in a Public Power community!), you have the capability to fully power your homes and businesses. So, next time you flip on a light switch, run a load of laundry, or make a cup of coffee, remember that electricity is not only a necessity in daily life, but that it also offers one of the greatest values of any product or service in today's world. ●

New Look for the Municipal Power News

Readers of the Municipal Power News may notice something different about the publication: it's now in full color! This change is in response to a growing need for visual imagery, making the newsletter more visually pleasing for its readers.

The Municipal Power News is a periodic publication by the Indiana Municipal Power Agency, your community's wholesale power provider. This newsletter aims to inform readers about local community news as well as relevant and helpful information about power and the electric industry. IMPA welcomes comments, questions and suggestions about the newsletter's new look – please send all comments to newsletter@impa.com or 11610 N. College Ave.; Carmel, IN 46032.

The newsletters are also available online! To receive your newsletter electronically, visit www.impa.com, click on News & Publications, and then Municipal Power News. You can then enter your name, e-mail address and community. ●

Pecan Pie

Recipe submitted by Gail Norton of Washington, Indiana.

- 3 eggs, beaten
- 1 cup dark Karo syrup
- 2 tbsp. vanilla
- 1/8 tsp. salt
- 9-inch pie shell
- 2 tbsp. vanilla
- 1/2 cup packed brown sugar
- 1/2 stick (1/4 cup) butter- melted
- 1 1/2 pecan halves

Stir eggs, Karo syrup, brown sugar, butter, vanilla and salt until blended. Add pecans to the mixture and coat well. Pour mixture over a 9-inch pie shell. Bake in center of oven 15 minutes at 425 degrees. Turn oven down to 350 degrees and bake another 40 minutes or until center is done.

Smoked Sausage Soup

Recipe submitted by Jean Marion of Rensselaer, Indiana.

- 1/2 pound smoked peeled sausage
- 2 cups frozen corn
- 1 rib of celery
- 1/2 tsp. garlic powder
- 1 1/2 cups milk
- salt and pepper to taste
- 6 medium potatoes, and diced
- 1 can chicken broth
- 1/4 cup sliced carrots
- 1/2 tsp. onion powder
- 2/3 cup shredded cheese

Dice and brown the 1/2 pound of smoked sausage until done. Set the sausage aside and add the remaining ingredients into a large stockpot. Bring to a boil and then reduce to a simmer. Add the sausage, and simmer for 15 minutes.

Whitley Municipal Electric Utility.

IMPA Commissioner: Randall Cokl

Save Energy This Spring!

As the warmer months approach, here are a few tips to help save energy during the spring months:

- Schedule regular maintenance for your cooling equipment
- Vacuum registers regularly to remove any dust buildup. Ensure that furniture and other objects are not blocking the airflow through your registers.
- Avoid placing lamps or TV sets near your room air-conditioning thermostat. The thermostat senses heat from these appliances, which can cause the air conditioner to run longer than necessary.
- If you use air conditioning, a ceiling fan will allow you to raise the thermostat settings about 4 degrees F with no reduction in comfort.

The best way to reduce your electric bill is to do everything you can to make your home more energy efficient. ●
